

## NEW EQUIPMENT

## 440 Ton Stamping Press

Monti Cincinnati recently invested in a 440 ton SEYI Straight side press. This 2 point press is designed to offer an optimized solution for minimal deflection in achieving high precision stamping. The high transmission gears and rigid crankshaft assures a high degree of accuracy during every punch.

Mazak 2.5Kw CO<sup>2</sup> Laser

Monti Greenwood obtained a Laser Cutting system to meet our demand for high variation. This not only reduces operator dependency, produces higher quality cuts and increases productivity but allows Monti to pass the savings onto you!

## FUN FACTS ABOUT MONTI INC.

**18%**

Decrease in Formal Customer complaints 1<sup>ST</sup> half of 2016.

**54%**

Decrease in Internal PPM during last 12 months

## What can Monti Do for you?

By Thomas Mueller – Sales Engineer

In June of 2015, Mont Inc. relocated its Corporate headquarter to our new address off Reading Road in the suburbs of Cincinnati Ohio. The new 300,000 sq. ft. facility encompasses the vision that owner Gavin Narburgh intended almost 40 years ago. From Quality and Safety improvements to increasing customer performance metrics; the last few months have been full of change. We welcome the opportunity to share some of our success stories.

### Monti's Strategic foundation

The objective of Monti Inc. is to achieve sustained profitable growth by providing products that consistently meet the needs of our customers. We, At Monti Inc., accomplish this by being quick, flexible, and customer focused. Over the last few years, we have truly focused on this objective to recognize and improve our core competencies. From our ability to adapt to our customers' needs to our attention to problem solving and collaboration; our true success is in the effectiveness of not only our mutually beneficial long-term relationships but also that of our employees and suppliers.

### Giving back to our Employees

August of this year, we held our 35<sup>th</sup> annual Monti company picnic at Coney Island. The weather held out and after a short dip in the pool, 200+ employees, family members and friends enjoyed a wonderful cookout and some cold refreshing beverages. Afterwards, many of our staff took advantage of the live shows and family oriented attractions held at the park. As John Maxwell once stated, "Tend to the people, and they will tend to the business." From Reds games to offsite team building exercises, we have many more exciting activities planned for 2016.

### Being Customer focused

Monti is constantly looking for ways to improve its internal processes. July of this year, we scheduled an SA13 ISO surveillance Audit to validate the improvements that took place within our facility. The objective of this audit was to determine the conformity of Monti's managerial system while focusing on the ability to meet statutory, regulatory and contractual customer requirements. This Audit was a **HUGE** success for our organization and solidified many of the core values we knew were being upheld during day to day operations. Both of our Satellite facilities, located in Greenwood and Sumter SC, are currently undergoing the process of becoming ISO9001:2008 certified. The emphasis of the Monti Quality Management System is to focus on meeting the customers' expectations to deliver full customer satisfaction. We know this improvement will aid in continually monitoring and managing quality related issues across all of Monti's operations.

### Workplace Safety

In July of this year, under the direction of HR Manager Molly Fender, Monti instituted its first Safety Audit team. Consisting of 9 members, from various levels of the organization, this team conducts weekly audits that spotlight anything from PPE, housekeeping standards to unobstructed fire and emergency equipment. Monti knows the value of investing in safety. "Employees are our most valuable resource," Jay Binder, Monti's COO, "Their safety is our MOST serious responsibility." Determined to sustain our excellent safety ratings, we understand being proactive is the only way to continuously improve.
